

# Tips for buying cruise tickets

- 1) Though you should begin saving now, its not often that cruises get completely booked. Waiting until its closer to your travel dates will allow you to get a lower rate (last minute trips are the cheapest) However; this is a gamble and we do not advise you to wait any longer that 1-2 months before the trip.
- 2) Consider applying for the Carnival Credit Card (or using a card you already have) when funding your vacation. We vacation annually! This means you can fund your trip, pay it off during the upcoming year and have it ready to use for the following years trip. This also allows you to rack up points on your card, which eventually can be used towards another trip, airfare, etc.
- 3) Always ask for discounts and promotions. For simply inquiring you may receive a discount on your tickets, casino cash, free drinks aboard, or other special offers.
